ACTA MECHANICA

Vol. 99, 1993

Contents

Contributed Papers

Fu, S., Huo, Y., Müller, I.: Thermodynamics of pseudoelasticity — an analytical approach. . . . . 1—19

Gong, S. X., Meguid, S. A.: Interacting circular inhomogeneities in plane elastostatics. . . . . 49—60

Gorla, R. S. R.: Mixed convection in an axisymmetric stagnation flow on a vertical cylinder. . . . . 113—123

Gupta, G., Massoudi, M.: Flow of a generalized second grade fluid between heated plates. . . . . 21—33

Güven, U.: On the elastic-plastic rotating shrink fit with linearly hardening hub exhibiting variable thickness in exponential form. . . . . 125—134

Jones, A. T., Ingham, D. B.: Flow reversal in a combined convection flow of Newtonian fluid in a vertical duct. . . . . 135—153

Kamel, M. T., Chan Man Fong, C. F.: Micropolar fluid flow between two eccentric coaxially rotating spheres. . . . . 155—171

Krawczuk, M.: Natural vibration of cracked rotating beams. . . . . 35—48

Liu, S., Haddow, J. B., Dost, S.: A variational approach to a circular hyperelastic membrane problem. . . . . 191—200

Riahi, D. N.: Effect of rotation on the stability of the melt during the solidification of a binary alloy. . . . . 95—101

Saxena, H. S., Dhaliwal, R. S., He, W., Rokne, J. G.: Penny-shaped interface crack between dissimilar nonhomogeneous elastic layers under axially symmetric torsion. . . . . 201—211

Sharma, V. D., Pandey, B. D., Sharma, R. R.: Weak discontinuities in a non-equilibrium flow of a dusty gas. . . . . 103—111

Sladek, V., Sladek, J., Tanaka, M.: Nonsingular BEM formulations for thin-walled structures and elastostatic crack problems. . . . . 173—190

Tejchman, J., Wu, W.: Numerical study on patterning of shear bands in a Cosserat continuum. . . . . 61—74

Theocaris, P. S.: Elastic-plastic analysis of cracked plates in plane stress: an experimental study. . . . . 75—93

Notes

Chandrasekharaiah, D. S., Cowin, S. C.: A complete solution for a unified system of field equations of thermoelasticity and poroelasticity. 225—233

Liu, G.-L.: A variable-domain variational theory using Clebsch variables for hybrid problems of 2-D transonic rotational flow. . . . . 219—223

Petrescu, S., Fetecău, C.: Liquid-fluid heat transfer at direct contact, accompanied by solidification. The colling stage. . . . . 213—218
